

APOCALYPTICATS WHITEPAPER.

1. WHO ARE THE APOCALYPTICATS?

Apocalypticats are a finite collection of 3333 randomly generated cats on the Cardano blockchain.

2. WHAT IS OUR MISSION?

Our mission is to prepare you for the apocalyptic times, CUSHION THE EFFECT OF RUG PULLS, organically grow our community through collaborations and with our story , we will provide value to Apocalypticats through applying utilities.

We are also focused on building in the metaverse, we are one Apocalypticat family!! WAGMI!!

UTILITIES?

1. RUGPULL REFUNDS.

We are the FIRST CNFT project that provides refunds for rugpull victims.

I was rugged when I started flipping CNFT. I lost a good sum of money. That feeling of despair can't be described. It can only be felt!

The pain majorly inspired me to start project apocalypticats.

Part of what apocalypticats stand for is being prepared! By being a holder of Apocalypticats in the top 1500 ranking after mint you are

also holding a RUGPULL REFUND POLICY.

This policy is in case you mint a rugpulled project, you can send us your rugpulled nft and we will send you back a percentage of that rug's initial mint price!

Details of percentages will be voted on by the community. We will appropriate a portion of the funds from mint into our treasury specifically for easing the burn of RUGS.

Terms and Conditions will apply.

2. SHORT STRIPS/ LORE.

This utility is something that's fun and gives our cats character and more meaning, thus providing it with more value! The founder being a huge fan of D&D literature and having experienced working on a comic for a CRONOS NFT project, we are confident we have what it takes to deliver some badass lore and include the community in steering the direction while starring in these short strips!!!

3. BUILDING IN A NEW WORLD.

Everyone out there is promising new "Metaverses". Not us, we plan to develop in metaverses that already exist. As a project, we value the community's input and we will be making a metavault where the community will decide on what metaverses to invest and develop in with project funds for ALL verified holders. Thi would be done through a voting system after mint.

4. RANK BENEFITS

There will be exclusive benefits for holders of Apocalypticats, we plan on subdividing rooms inside of PCA s inside of pavia, a home compound/base constructed. Inside of that base will be Rooms each of the top 333 cats will be made a space(room) dedicated to them along with the founder! You don't need to

own a pavia plot to have a place to lay your tail at night in pavia if you are an exclusive member of apocalypticats.

5. APOCALYPTIC MERCH.

We do plan on creating apocalypticat merchandise in the nearest future.

COLLABORATIONS?

There are many projects the cats would love to partner with for various reasons. We could be partnering for PFPs with metaverse projects for our short strips and lore. We could also be collaborating with other projects for giveaways and events. Whatever it is, apocalypticats are confident we can make some great friends and powerful partnerships.

It's a bold new world for CNFT and I am sure W.A.G.M.I!

Purrrrr!!!
